

Encapsulated Coil Heaters (CHB/CHI)

ELECTRIFICATION OF NOZZLES CHI [DIE CASTING]

- High temperature cables protected by flexible metal tube having a length of 1,750 mm.
- Threaded point to place thermocouple if necessary.
- Fully sealed up in stainless steel.
- Working temperature up to 450°C.

There does exist the possibility to electrify directly the nozzle [always customer supplied].
